

OPCEnumerate.OpcClient.Initialize

OPCEnumerate.OpcClient.Terminate

OPCEnumerate.OpcClient.Get
Application

```
graph LR; A[OPCEnumerate.OpcClient.Initialize] --> C[OPCEnumerate.OpcClient.Get Application]; B[OPCEnumerate.OpcClient.Terminate] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes with black borders contain the text 'OPCEnumerate.OpcClient.Initialize' and 'OPCEnumerate.OpcClient.Terminate'. On the right, a gray rectangular box with a black border contains the text 'OPCEnumerate.OpcClient.Get Application'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'Initialize' and 'Terminate' methods are associated with or depend on the 'Get Application' method.
