

com.softing.opc.client.api.  
DaSession.getForcedOpcSpecification

com.softing.opc.client.api.  
DaSession.getSupportedOpcSpecification

com.softing.opc.client.enums.  
EnumOPCSpecification.getEnum

```
graph LR; A[com.softing.opc.client.api.DaSession.getForcedOpcSpecification] --> C[com.softing.opc.client.enums.EnumOPCSpecification.getEnum]; B[com.softing.opc.client.api.DaSession.getSupportedOpcSpecification] --> C;
```

The diagram illustrates a mapping from two different API methods to a single enum method. On the left, two white rectangular boxes with black borders contain the following text: the top box has 'com.softing.opc.client.api.' followed by 'DaSession.getForcedOpcSpecification', and the bottom box has 'com.softing.opc.client.api.' followed by 'DaSession.getSupportedOpcSpecification'. On the right, a gray rectangular box with a black border contains the text 'com.softing.opc.client.enums.' followed by 'EnumOPCSpecification.getEnum'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both API methods utilize the same enum method.
