

CGridCtrl::PreSubclassWindow

```
graph LR; A[CGridCtrl::PreSubclassWindow] --> B[CGridCtrl::Initialise]; B --> C[CTitleTip::SetParentWnd];
```

The diagram illustrates a sequence of three Windows API calls. The first call, CGridCtrl::PreSubclassWindow, is highlighted with a grey background. A blue arrow points from this box to the second box, CGridCtrl::Initialise, which has a white background. Another blue arrow points from the second box to the third box, CTitleTip::SetParentWnd, which also has a white background. All three boxes are rectangular and have a thin black border.

CGridCtrl::Initialise

CTitleTip::SetParentWnd
