

SODaSIItemTagConnectQueue
OneItemsStore::removeConnected
Object

SODmCObjectView::removeFrom
WorkingList

SOCmnList::removeObject

```
graph LR; A["SODaSIItemTagConnectQueue  
OneItemsStore::removeConnected  
Object"] --> C["SOCmnList::removeObject"]; B["SODmCObjectView::removeFrom  
WorkingList"] --> C;
```

The diagram illustrates a mapping or dependency between two source functions and a common target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'SODaSIItemTagConnectQueue' followed by 'OneItemsStore::removeConnected' and 'Object' on separate lines. The bottom box contains 'SODmCObjectView::removeFrom' and 'WorkingList' on separate lines. On the right, there is a single gray rectangular box with the text 'SOCmnList::removeObject'. Two blue arrows originate from the right side of the top white box and the right side of the bottom white box, both pointing towards the left side of the gray box.
