

initializeServer

```
graph LR; A[initializeServer] --> B[_SOXpSCreateSubCondition Class];
```

The diagram consists of two rectangular boxes connected by a blue arrow. The first box on the left is white with a black border and contains the text 'initializeServer'. A blue arrow points from the right side of this box to the left side of a second box. The second box is gray with a black border and contains the text '\_SOXpSCreateSubCondition Class'.
