

C++/samples/client
/AEEventTypes/AEEventTypes
Dlg.h

```
graph BT; A["C++/samples/client /AEEventTypes/AEEventTypes Dlg.h"] --> B["C++/samples/client /AEEventTypes/AEEventTypes.cpp"]; A --> C["C++/samples/client /AEEventTypes/AEEventTypes Dlg.cpp"];
```

The diagram illustrates the relationship between three C++ source files. At the top is a header file, 'C++/samples/client /AEEventTypes/AEEventTypes Dlg.h', which is shaded gray. Below it are two source files: 'C++/samples/client /AEEventTypes/AEEventTypes.cpp' on the left and 'C++/samples/client /AEEventTypes/AEEventTypes Dlg.cpp' on the right. Both source files have blue arrows pointing up to the header file, indicating that they include the header.
