

C++/samples/client  
/DAGetProperties/OpcClient.h

```
graph BT; A["C++/samples/client /DAGetProperties/Console.cpp"] --> B["C++/samples/client /DAGetProperties/OpcClient.h"]; C["C++/samples/client /DAGetProperties/OpcClient.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: C++/samples/client /DAGetProperties/OpcClient.h. Below it are two white boxes representing source files. The left box is C++/samples/client /DAGetProperties/Console.cpp and the right box is C++/samples/client /DAGetProperties/OpcClient.cpp. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.
