

DABrowse.OpcClient.Initialize

DABrowse.OpcClient.Initialize  
DaObjects

DABrowse.OpcClient.Terminate

DABrowse.OpcClient.GetApplication

```
graph LR; A[DABrowse.OpcClient.Initialize] --> D[DABrowse.OpcClient.GetApplication]; B[DABrowse.OpcClient.Initialize DaObjects] --> D; C[DABrowse.OpcClient.Terminate] --> D;
```

The diagram illustrates a dependency or relationship where three distinct methods on the left side all point to a single method on the right side. The three source methods are 'DABrowse.OpcClient.Initialize', 'DABrowse.OpcClient.Initialize DaObjects', and 'DABrowse.OpcClient.Terminate'. These are arranged vertically. The target method, 'DABrowse.OpcClient.GetApplication', is positioned to the right of the middle source method. Three blue arrows originate from the right side of each source method box and converge on the left side of the target method box. The target box is shaded gray, while the source boxes are white with black borders.
