

com.softing.opc.client.api.
ObjectSpaceElement.setTargetState

```
graph LR; A[com.softing.opc.client.api.  
ObjectSpaceElement.setTargetState] --> B[com.softing.opc.client.api.  
ObjectSpaceElement.getHandle]; A --> C[com.softing.opc.client.impl.jna.  
OTClient.OTCChangeTargetState];
```

The diagram illustrates a method call from the `com.softing.opc.client.api.ObjectSpaceElement.setTargetState` method to two different implementations. The first implementation is `com.softing.opc.client.api.ObjectSpaceElement.getHandle`, and the second is `com.softing.opc.client.impl.jna.OTClient.OTCChangeTargetState`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the call.
