

C++/samples/client
/AECondition/AEConditionDlg.h

```
graph BT; A["C++/samples/client /AECondition/AECondition.h"] --> B["C++/samples/client /AECondition/AEConditionDlg.h"]; C["C++/samples/client /AECondition/AEConditionDlg.cpp"] --> B;
```

The diagram illustrates a C++ project structure. At the top is a header file box (shaded gray) labeled 'C++/samples/client /AECondition/AEConditionDlg.h'. Below it are two source file boxes (white with black borders). The left box is labeled 'C++/samples/client /AECondition/AECondition.h' and the right box is labeled 'C++/samples/client /AECondition/AEConditionDlg.cpp'. Two blue arrows point from the bottom of the left and right boxes to the bottom of the top box, indicating that both source files include the header file.
