

DaConsole_Service.MyDaltem.
HandlePerformStateTransition

DaConsole_Service.MyDaltem.
HandleStateChanged

DaConsole_Service.MyDaltem.
MyDaltem

```
graph LR; A[DaConsole_Service.MyDaltem.  
MyDaltem] <--> B[DaConsole_Service.MyDaltem.  
HandlePerformStateTransition]; A <--> C[DaConsole_Service.MyDaltem.  
HandleStateChanged];
```

The diagram illustrates a central class, `DaConsole_Service.MyDaltem.MyDaltem`, which is shaded gray. It has two bidirectional relationships with two other components, represented by white boxes with black borders. The top component is `DaConsole_Service.MyDaltem.HandlePerformStateTransition`, and the bottom component is `DaConsole_Service.MyDaltem.HandleStateChanged`. Each relationship is represented by a blue double-headed arrow connecting the central class to the respective component.
