

SODmCApp::InitInstance

SODmCApp::OnFileOpen

SODmCApp::OnOpenRecentFile

SODmCApp::doOpen

```
graph LR; A[SODmCApp::InitInstance] --> D[SODmCApp::doOpen]; B[SODmCApp::OnFileOpen] --> D; C[SODmCApp::OnOpenRecentFile] --> D;
```

The diagram illustrates a central method, SODmCApp::doOpen, which is the target of three other methods: SODmCApp::InitInstance, SODmCApp::OnFileOpen, and SODmCApp::OnOpenRecentFile. Each of these three methods is shown in a white box on the left, and SODmCApp::doOpen is shown in a gray box on the right. Blue arrows point from each of the three white boxes to the gray box, indicating that these three methods call or invoke SODmCApp::doOpen.
