

C++/samples/server
/DevTrainingModbus/MyCreator.h

```
graph BT; A["C++/samples/server /DevTrainingModbus/Console.cpp"] --> C["C++/samples/server /DevTrainingModbus/MyCreator.h"]; B["C++/samples/server /DevTrainingModbus/OpcServer.cpp"] --> C;
```

The diagram illustrates a C++ project structure where two source files, Console.cpp and OpcServer.cpp, both include the header file MyCreator.h. The header file is located at C++/samples/server/DevTrainingModbus/MyCreator.h. The source files are located at C++/samples/server/DevTrainingModbus/Console.cpp and C++/samples/server/DevTrainingModbus/OpcServer.cpp. Blue arrows point from the source files to the header file, indicating the include relationship.
