

CAEConditionDlg::OnBnClicked
DisableConditions

CAEConditionDlg::OnBnClicked
EnableConditions

SoftingOPCToolboxClient
::AeSession::enableAeConditions
BySource

```
graph LR; A[CAEConditionDlg::OnBnClicked DisableConditions] --> C[SoftingOPCToolboxClient::AeSession::enableAeConditions BySource]; B[CAEConditionDlg::OnBnClicked EnableConditions] --> C;
```

The diagram illustrates two separate function calls from the left, both pointing to a single target on the right. The top call is 'CAEConditionDlg::OnBnClicked DisableConditions' and the bottom call is 'CAEConditionDlg::OnBnClicked EnableConditions'. Both calls are represented by blue arrows pointing to a gray rectangular box on the right. This box contains the text 'SoftingOPCToolboxClient ::AeSession::enableAeConditions BySource'.
