graph LR; A[TestClientGui.Elements.DaSubscriptionRead.Execute] --> D[Softing.OPCToolbox.Client.SubscriptionReadEventHandler]; B[DaConsole.MyDaSubscription.MyDaSubscription] --> D; C[DaConsole_Service.MyDaSubscription.MyDaSubscription] --> D;
```

The diagram illustrates a call flow where three different components invoke a common handler. Three white rectangular boxes on the left, each containing a fully qualified class and method name, have blue arrows pointing to a single gray rectangular box on the right. The gray box also contains a fully qualified class and method name. The arrows originate from the right side of each white box and point towards the left side of the gray box.
