

DllSample.Dll.Start

DllSample.Dll.Stop

DllSample.OpcServer.Terminate

```
graph LR; A[DllSample.Dll.Start] --> C[DllSample.OpcServer.Terminate]; B[DllSample.Dll.Stop] --> C;
```

The diagram illustrates a flow where two separate processes, 'DllSample.Dll.Start' and 'DllSample.Dll.Stop', both lead to a single process, 'DllSample.OpcServer.Terminate'. The 'Start' and 'Stop' boxes are white with black borders, while the 'Terminate' box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
