

CGridCtrl::OnLButtonDbClk

CGridCtrl::OnLButtonDown

CGridCtrl::OnMouseMove

CGridCtrl::MouseOverColumn  
ResizeArea

```
graph LR; A[CGridCtrl::OnLButtonDbClk] --> D[CGridCtrl::MouseOverColumn<br/>ResizeArea]; B[CGridCtrl::OnLButtonDown] --> D; C[CGridCtrl::OnMouseMove] --> D;
```

The diagram illustrates a central target box, 'CGridCtrl::MouseOverColumn ResizeArea', which is shaded gray. Three white boxes with black borders are positioned to its left. Each white box contains a method name: 'CGridCtrl::OnLButtonDbClk' (top), 'CGridCtrl::OnLButtonDown' (middle), and 'CGridCtrl::OnMouseMove' (bottom). A blue arrow originates from the right side of each white box and points directly to the left side of the gray target box, indicating that these three methods all trigger or are associated with the 'MouseOverColumn ResizeArea' event.
