

com.softing.opc.client.api.
DaSession.setLocaleId

com.softing.opc.client.api.
DaSubscription.setLocaleId

com.softing.opc.client.impl.
NameDecoder.getLCID

```
graph LR; A[com.softing.opc.client.api.DaSession.setLocaleId] --> C[com.softing.opc.client.impl.NameDecoder.getLCID]; B[com.softing.opc.client.api.DaSubscription.setLocaleId] --> C;
```

The diagram illustrates a mapping from two public API methods to a single internal implementation method. On the left, two white boxes with black borders contain the API method names: 'com.softing.opc.client.api.DaSession.setLocaleId' and 'com.softing.opc.client.api.DaSubscription.setLocaleId'. On the right, a gray box with a black border contains the implementation method name: 'com.softing.opc.client.impl.NameDecoder.getLCID'. Two blue arrows point from each of the left boxes to the right box, indicating that both API methods delegate the call to this specific implementation.
