

SOXpSCondition::createEvent

processCommandLine

SOCmnString::find

```
graph LR; A[SOXpSCondition::createEvent] --> C[SOCmnString::find]; B[processCommandLine] --> C;
```

The diagram illustrates a call graph where two functions, `SOXpSCondition::createEvent` and `processCommandLine`, both call the function `SOCmnString::find`. The source functions are represented by white boxes with black borders, while the target function is represented by a gray box with a black border. Blue arrows indicate the direction of the calls from the source functions to the target function.
