

C++/samples/server  
/Serial\_IO/MyCreator.h

```
graph BT; Console[C++/samples/server/Serial_IO/Console.cpp] --> MyCreator[C++/samples/server/Serial_IO/MyCreator.h]; OpcServer[C++/samples/server/Serial_IO/OpcServer.cpp] --> MyCreator;
```

The diagram illustrates a C++ project structure where two source files, Console.cpp and OpcServer.cpp, both include the header file MyCreator.h. The header file is located at C++/samples/server/Serial\_IO/MyCreator.h. The source files are located at C++/samples/server/Serial\_IO/Console.cpp and C++/samples/server/Serial\_IO/OpcServer.cpp. Blue arrows point from the source files to the header file, indicating the include relationship.
