

C++/samples/client
/ClientDLL/TestDll/stdafx.h

```
graph BT; A["C++/samples/client /ClientDLL/TestDll/TestDll.cpp"] --> C["C++/samples/client /ClientDLL/TestDll/stdafx.h"]; B["C++/samples/client /ClientDLL/TestDll/stdafx.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: C++/samples/client /ClientDLL/TestDll/stdafx.h. Below it are two white boxes representing source files. The left box is C++/samples/client /ClientDLL/TestDll/TestDll.cpp and the right box is C++/samples/client /ClientDLL/TestDll/stdafx.cpp. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

C++/samples/client
/ClientDLL/TestDll/TestDll.cpp

C++/samples/client
/ClientDLL/TestDll/stdafx.cpp
