

MyAeSubscription::handle
AeConditionsChanged

CAEConditionDlg::OnBnClicked
ButtonConditionState

MyAeSubscription::getState
ToString

```
graph LR; A[MyAeSubscription::handle  
AeConditionsChanged] --> C[MyAeSubscription::getState  
ToString]; B[CAEConditionDlg::OnBnClicked  
ButtonConditionState] --> C;
```

The diagram illustrates a callout mechanism. Two white rectangular boxes on the left contain text. The top box, labeled 'MyAeSubscription::handle AeConditionsChanged', has a blue arrow pointing to the top of a gray rectangular box on the right. The bottom box, labeled 'CAEConditionDlg::OnBnClicked ButtonConditionState', has a blue arrow pointing to the middle of the same gray box. The gray box contains the text 'MyAeSubscription::getState ToString'.
