

com.softing.opc.client.api.
DaSubscription.setName

daBrowse.OpcClient.Trace

daConsole.OpcClient.trace

com.softing.opc.client.api.
Application.trace

```
graph LR; A[com.softing.opc.client.api.DaSubscription.setName] --> D[com.softing.opc.client.api.Application.trace]; B[daBrowse.OpcClient.Trace] --> D; C[daConsole.OpcClient.trace] --> D;
```

The diagram illustrates a mapping from three source methods to a single target method. On the left, three white rectangular boxes with black borders contain the source method names: 'com.softing.opc.client.api.DaSubscription.setName', 'daBrowse.OpcClient.Trace', and 'daConsole.OpcClient.trace'. On the right, a gray rectangular box with a black border contains the target method name: 'com.softing.opc.client.api.Application.trace'. Three blue arrows originate from the right side of each source box and point towards the left side of the target box, indicating a many-to-one relationship.
