

SODmCApp::InitInstance

SODmCDlgOptions::onTrcOff

SODmCDlgOptions::onTrcOn

SODmCApp::enableTrace

```
graph LR; A[SODmCApp::InitInstance] --> D[SODmCApp::enableTrace]; B[SODmCDlgOptions::onTrcOff] --> D; C[SODmCDlgOptions::onTrcOn] --> D;
```

The diagram illustrates a call graph where three source functions point to a single target function. The source functions are arranged vertically on the left: SODmCApp::InitInstance at the top, SODmCDlgOptions::onTrcOff in the middle, and SODmCDlgOptions::onTrcOn at the bottom. The target function, SODmCApp::enableTrace, is located on the right. Three blue arrows originate from the right side of each source box and point towards the left side of the target box. The target box is shaded gray, while the source boxes are white with black borders.
