

ServerDAServer::getChild
NamesOfNodeName

ServerDAServer::getChildrenData

SODaSServer::matchString
Filter

```
graph LR; A[ServerDAServer::getChildNamesOfNodeName] --> D[SODaSServer::matchStringFilter]; B[ServerDAServer::getChildrenData] --> D;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left represent method calls: 'ServerDAServer::getChildNamesOfNodeName' (top) and 'ServerDAServer::getChildrenData' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'SODaSServer::matchStringFilter', indicating that both methods on the left depend on or call the 'matchStringFilter' method on the 'SODaSServer' class.
